Everything is possible, you can wish for anything you want. It doesn't matter if your wishes are big or small, ordinary or extraordinary. What matters is that they are sincere and truly yours.

Petra Šuštar invites us to a green world to relax and calm our minds down with her meditation book for children. The setting of the first picture book of the trilogy, The Emerald Green Forest is a magical forest and with the help of animals living in the forest, it helps children to cope with fear, sadness, and worry and brings a sense that everything in life is possible. One day the author received a very special message from the mommy of a six-year-old girl with leukemia to thank her for The Emerald Green Forest by saying that it was very helpful and the book helps her daughter relax and calm down. After that, Petra decided that The Emerald Green Forest needs to reach as many children as possible.
